COVID-19 case count — a whatsapp bot

https://github.com/AbhayRoy234/covid_19_bot

This whatsapp bot gives information of current active cases as per the query given to it. I have developed this bot with the help of flask and Twilio API (used for receiving and sending messages from user), The data provided by the bot is fetched from the government website, this is accomplished with the help of BeautifulSoup4 (for web scrapping)
